

The build is coming,

# What's Your PLAN?

The AMETI Eastern Busway Project build will start in March/April 2019. This new transformational transport project will provide better public transport connections, faster journey times, more travel choice and improved safety.

During construction there will be some disruption to major routes - particularly during morning and afternoon peak traffic times, around Lagoon Drive and the Panmure end of Pakuranga Road.

Sitting in traffic isn't fun, but by working together and all doing our bit, we can help minimise congestion.

"We're choosing to shop local, to minimise the time spent in the car and to get to know our community better."

Kim,  
Local Parent

**P** **Public Transport, Walking & Cycling:** Additional bus services are being arranged to help provide better travel options during construction and further information will be provided shortly.

**L** **Lessen Car Use:** Whether it's carpooling with friends, shopping local or taking the walking school bus you can save on fuel, and help reduce traffic congestion.

**A** **Alternate Travel Route:** If you're traveling into town, take Waipuna Bridge or Highbrook Drive, to avoid the traffic on Panmure Bridge. Check out Googlemaps to find alternative options.

**N** **New work schedule:** This may not be an option for you, but many organisations are encouraging 'flexi-time' with their staff. By commuting outside of peak hour traffic, you can avoid the congestion and arrive fresh to start your day.
